1300 - 1400

SUMMARY OF INFORMATION

Longford
During this session, I first could see a round body of water. On the water, sat one or two vessels and they were close to a dock. There was no activity here.

Thom
I then could see a very large object that sat high on a platform. The object had many windows. The object looked like a train. There were people walking around on the ground. There was much activity here. People were walking up to the large object. This scene reminded me of an outside terminal. I could see one man walking out of this object and he was rolling a large wheel with bright shiny spokes.

I then was in an area where an airplane landed. Here men were taking the contraband out of the airplane and were rolling it up into blankets. The men were wearing masks over their heads.
